ABOUT US

Sponsored by the Air Force Research Lab Space Vehicles Directorate and the United States Space Force, the Catalyst Accelerator is a 3-month, semi-residential program located in Colorado Springs designed to increase the Space and Air Force's awareness and rapid acquisition of commercial dual-use space technology by providing relevant business development training to Accelerator companies and connecting these entrepreneurs with users, decision makers, and potential new customers in the DoD and commercial realms.

The Catalyst Accelerator has provided innovative capabilities to the Government since its inception in 2018. Each Accelerator has its own problem statement that is generated with the help of various Government customers who have complex problem sets that require innovative, dual-use solutions. For more information on problem statements and Accelerator topics, please visit the Catalyst Accelerator website below.

SPONSORSHIPS AT A GLANCE

Through sponsorship of the Catalyst Accelerator, our community has the opportunity to invest in promising, innovative companies that have a dual-use solution to a Department of Defense (DoD) challenge. Ultimately, your support helps get innovation into the hands of the US warfighter, while building our nation's economy. Your sponsorship will be visible to the local aerospace community to include Government, Industry, Academia, and others.

Furthermore, your sponsorship will help off-set the costs associated with travel and lodging for the companies participating in the Accelerator program and will assist them in the continued development of their cutting-edge technologies. Your support will also help facilitate dynamic networking events, high-caliber subject matter expert participation, and other relevant activities that help fast-track cohort company success.

As a community-supported program, the Catalyst Accelerator recognizes all sponsors who can donate any amount toward the success of the program. The levels of sponsorship and the corresponding benefits are contained in the table on the following page. Please note that amounts and return on investment for sponsors can be negotiated if necessary.

The levels of sponsorship are as follows:

- Corporate Sponsor - \$125K
- Session Sponsor - \$15K per session (2 weeks = 1 session)
 - Community Day/Demo Day Sponsor - \$5K or \$10K
 - Networking Event Sponsor - \$2K

CORPORATE SPONSORSHIP

What is a Corporate Sponsor?

As an alternative to the sponsorship levels outlined on the previous page, interested parties can elect for Corporate Sponsorship. The Corporate Sponsor is the sole sponsor of all 3 sessions for the entire cohort at a discounted rate of \$125K.

The Corporate Sponsor enjoys the benefits of the Session Sponsor, plus the following:

- Sole corporate sponsor of one cohort (additional Demo Day or Community Day sponsorships may be sought)
- One sponsor branded gift basket at Demo Day
- Opportunity to participate in planning and feedback sessions, if desired.
- Opportunity to participate in the cohort selection process. (normally 20-30 applications, 15 live pitches)
- Offer a 5-minute presentation during Demo Day.

For more information about sponsorships, please contact:

KiMar Gartman at KiMar.Gartman@CatalystCampus.org.

Thank you for your consideration of sponsorship of the Catalyst Accelerator, Colorado Springs!

We cannot run our program without the support of people like you.

ALUMNI REVIEWS

FIVE STARS!

"The Accelerator provided so many great networking connections, I will have a lot of time to work on developing the leads generated." - Digital Engineering: Modeling and Simulation Cohort

"The Catalyst Accelerator program was an excellent front door to work with the Defense Industry. I have already recommended it to a lot of people." - Hybrid Data Movement Cohort

"We expected to have some government interaction but not to be embedded in an ecosystem. I think it was 'bang on'." - International Space Domain Awareness Cohort

"Amazing opportunity. Our growth has been dynamic being here. You really accelerated our maturity as a business as well as executives. Huge sustain across the board." - Defensive Cyber Operations for Space Cohort
